

**Ever Dreamed of an AI Companion
You Could Take Anywhere?**

Pocket Artificial Intelligent Bot

by Cambodian Graduate Student of
Electronic Information and Technology

What is Pocket AI Bot?

A compact, voice-powered AI assistant built with ESP32 and XiaoZhi AI. Simply speak, ask questions, and interact with AI naturally—bringing the future of AI closer to everyone.

Wi-Fi Diagnostics

Ask about your IP address or Wi-Fi signal strength.

NTP Time Sync

Get the current time, synced automatically over the internet.

Multilingual

Supports English and Chinese voice interaction.

Voice Face Toggle

Switch between face display and text mode by voice.

Volume Control

Adjust the speaker volume by voice.

Music Playback

Play music using voice commands.

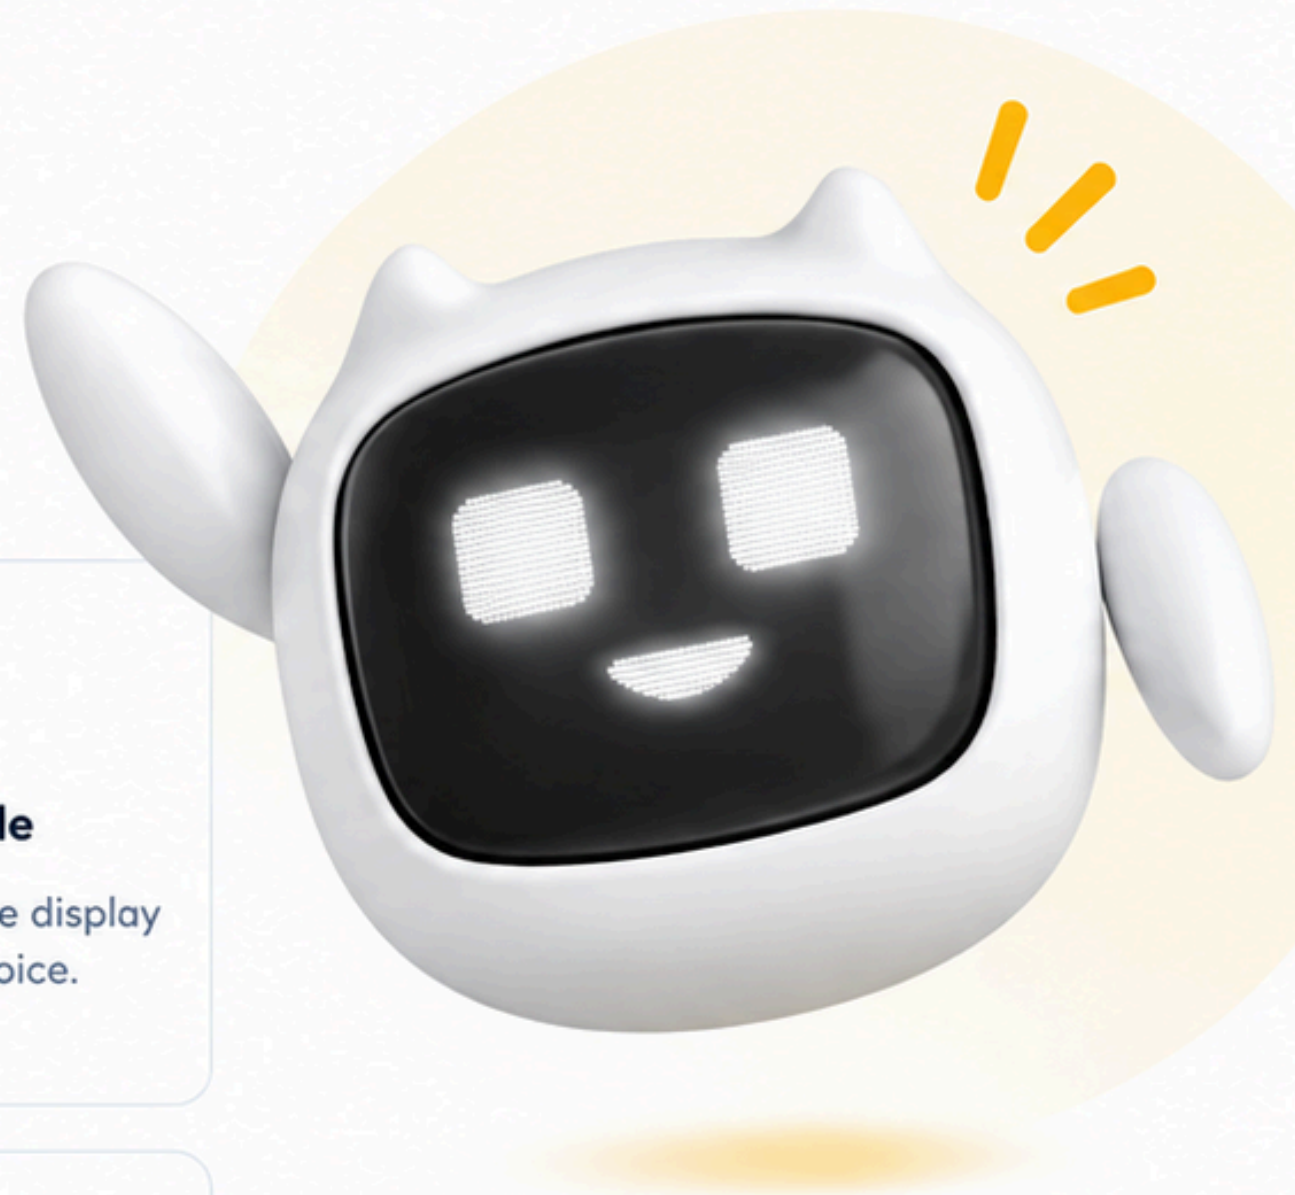

Conversation Memory

Keeps short-term context for more natural conversations.

Custom Wake Word

Activate the assistant with a chosen wake phrase, without pressing a button.
